PLEASE NOTE: This is a basic visual depiction of what the inflatable will look like. In the finished products the corners will round and soften, the inflatable will bulge in places not anticipated. Every care is taken to ensure your product inflates as desired, but it is the nature of an inflatable to become a ball. Some aspects are not possible or predictable.

PLEASE NOTE: It is important for you to sign the visual and mail or fax it back to us as we cannot be held responsible if you are unhappy with the end result due to design details that were not present.
